Sheave - Light Base
Greenlee 459

Part Number: P459S-LB
- Mounts directly to existing square light pole bolt patterns.
- Slotted mounting holes fit a wide range of bolt circle sizes.
- Tall enough to position sheave above most conduits.
- Rugged welded steel base structure.
- Allows user to install wires into outdoor light bases by pulling horizontally.
- Can also be used to feed wires into vertical light base conduit.
